OUR APPROACH TO PROJECTS

We continuously aim to improve the delivery of projects through the incorporation of lessons learned and the application of robust systems and process.

- Maintain **core team** of resources.
- Structure **project team** around **project and client needs**.
- Supplement resources with **selected skilled resources**.
- Focus on **Project, Engineering and Construction Project Management** (supported by sound engineering experience and qualifications).
- **Capital, Cost Saving** and **Business Improvement**.

While we maintain focus on the discipline of project management, our strong engineering profile adds significant value, as we assist in planning and interpretation of engineering solutions. Applying new and improved tools and techniques to continuously improve our ability to deliver projects.

IT IS PROJECTWAY'S GOAL TO ACHIEVE THE FOLLOWING:

- The **correct scope** is implemented to address the need and address the project objectives.
- The client pays a fair price **for the implemented scope**.
- The product is delivered within the best **possible time period** to optimise “**time to market**”.
- The product meets the **user requirement specification** and the **technical standards set** by the professional team.
- A suitable **integrated project team** focusses on delivery of the product.
- Project risks are **continuously identified, assessed and managed**.
- Documentation is **managed and stored**.
- **Goods and services** are procured to meet time, cost and quality requirements.
- The above is integrated towards a **successful project**.

QUALITY POLICY

Siddu Constructions will make quality a way of life. Quality is the result of good management and will be achieved by the way we get the right things done.

We believe there is always a better way to provide services to our clients and strive for continuous improvement. In rendering our services we will optimise resource utilisation and commit ourselves fully to the task at hand. We consider meeting client requirements as the minimum performance criteria and aim to surpass expectations.

SAFETY, HEALTH AND ENVIRONMENTAL POLICY

- Siddu Constructions is committed to a clean, safe and healthy environment for our employees, contractors, customers and the communities around us.
- Siddu Constructions will comply with all the applicable legislation, regulations and customers' requirements as minimum benchmark for its Safety, Health and Environment (SHE) Policy.
- ProjectWay will regularly review this policy, practices and performance to ensure ongoing improvements.
- Manage and Mitigate Risk with a Safety Training Program.
- Ensure Electrical Safety at Construction Sites.
- Implement Strict Security and Safety Protocols.
- Have a Safe Work Assessment Process in Place.
- Make Sure Chemical Storage Safety Requirements are Strictly Followed.
- Display Signage Clearly at the Construction Site.
- Plan and Prepare for Adverse Environmental Conditions.
- Provide Personal Protective Equipment.

OUR TEAM & EXPERIENCE

Our team is flexible and able to adjust to clients' specific needs with respect to geography, internal processes and systems, as well as the availability of resources. The core team of project managers consists of graduate civil, mechanical and industrial engineers, with inhouse Cost Management, Quality Control and Administration Support complementing our service delivery.

Teamwork includes open communication and everyone contributing to improve the workplace to safely and successfully achieve the construction goal. Good teamwork makes the job site safer and the work more efficient. That is why Siddu Construction is committed to cooperation on the job site and off of it.

Each project needs different people in accordance with their professionalism, knowledge, and experience, and requires them to work and coordinate with others from different companies. The construction industry has always dealt with the relationship between team, task, individual, and leadership. It is sufficient to say that teamwork is dominant in construction's cultural tradition and at the foundation of successful construction projects. Teams and teamwork in construction have been impacted by diverse and exceptional features in the construction industry, as in the way it goes about its business. This can be seen more in the application of integrated project delivery method, where teams start to work as one unit, creating faster delivery times, minimizing costs, and creating an enjoyable working relationship for the entire project team. However, there are several barriers to teamwork in construction, such as disrespect and mistrust, among various project participants and professional rivalry that must be overcome towards developing and maintaining teamwork throughout the entire project's process. Although this is not "the ideal" type of project, we pride ourselves in the fact that we have the skills and tenacity to get involved and ensure eventual success.
